EXPERIENCE

SOON (Solana Optimistic Network) — Developer Relations Engineer

Sep 2024 – Jun 2026

Remote

- Supported 50+ teams building on SOON's SVM execution environment from development through deployment.
- Built SDKs, developer tooling and docs across Solana/SVM infrastructure; supported an ecosystem that processed 60M+ transactions and \$300M+ in volume.
- Led technical workshops, hackathons and developer support; wrote 25+ technical pieces on SVM and rollup infrastructure.

Fetcch — Developer Relations Engineer

Aug 2023 – Aug 2024

Remote

- Built Pay.Wallet, a consumer payments app supporting cross-chain flows across 6+ networks.
- Built cross-chain payment and swap routing across Solana and EVM using Circle/CCTP, Squid, deBridge and Jupiter.
- Built backend infrastructure and SDKs for cross-chain payments, bridging and aggregation.

iCeipts — Software Engineer

Jan 2022 – Aug 2023

Remote

- Shipped consumer mobile products including Scan & Pay and ride-booking applications.
- Worked across mobile, payments, backend systems and location-based experiences.

SELECTED PROJECTS

ClearSign | *Solana Security*

clearsign.fun

- Building a human-readable security layer that explains what a Solana transaction will do before the user signs it.
- Built transaction decoding, hash-locked intent verification, expiring approvals and policy checks across transfers, Jupiter swaps and multisig workflows.

Shuffles | *Mobile DeFi*

@shuffles_xyz

- Built a React Native Solana DeFi wallet supporting swaps, DCA, limit orders and cross-chain transactions across 8+ networks.
- Reached 300+ active users and an 800+ waitlist; received a \$5K Wormhole xGrant.

Lads | *React Native*

joinlads.com

- Built and shipped a social fitness app integrating Apple Health and WHOOP; grew to 700+ beta installs, 800+ activities and 36K+ workout minutes.

TECHNICAL SKILLS

Languages / Apps: TypeScript, JavaScript, Rust, Solidity, React Native, Expo, Next.js, Node.js

Solana / Crypto: web3.js, Anchor, Jupiter, SPL, Circle/CCTP, Wormhole, deBridge, Squid, Axelar

Backend: PostgreSQL, Prisma, Supabase, REST APIs

EDUCATION

B.Tech, Computer Science

2024

COMMUNITY

Solana Fellow · Superteam Member · 30+ Hackathon Wins · Speaker at 25+ Developer Events
